

Installation Instructions

LUX-top® anchor eye on adapter plate
direct mounting concrete

Approved fastening substrate:

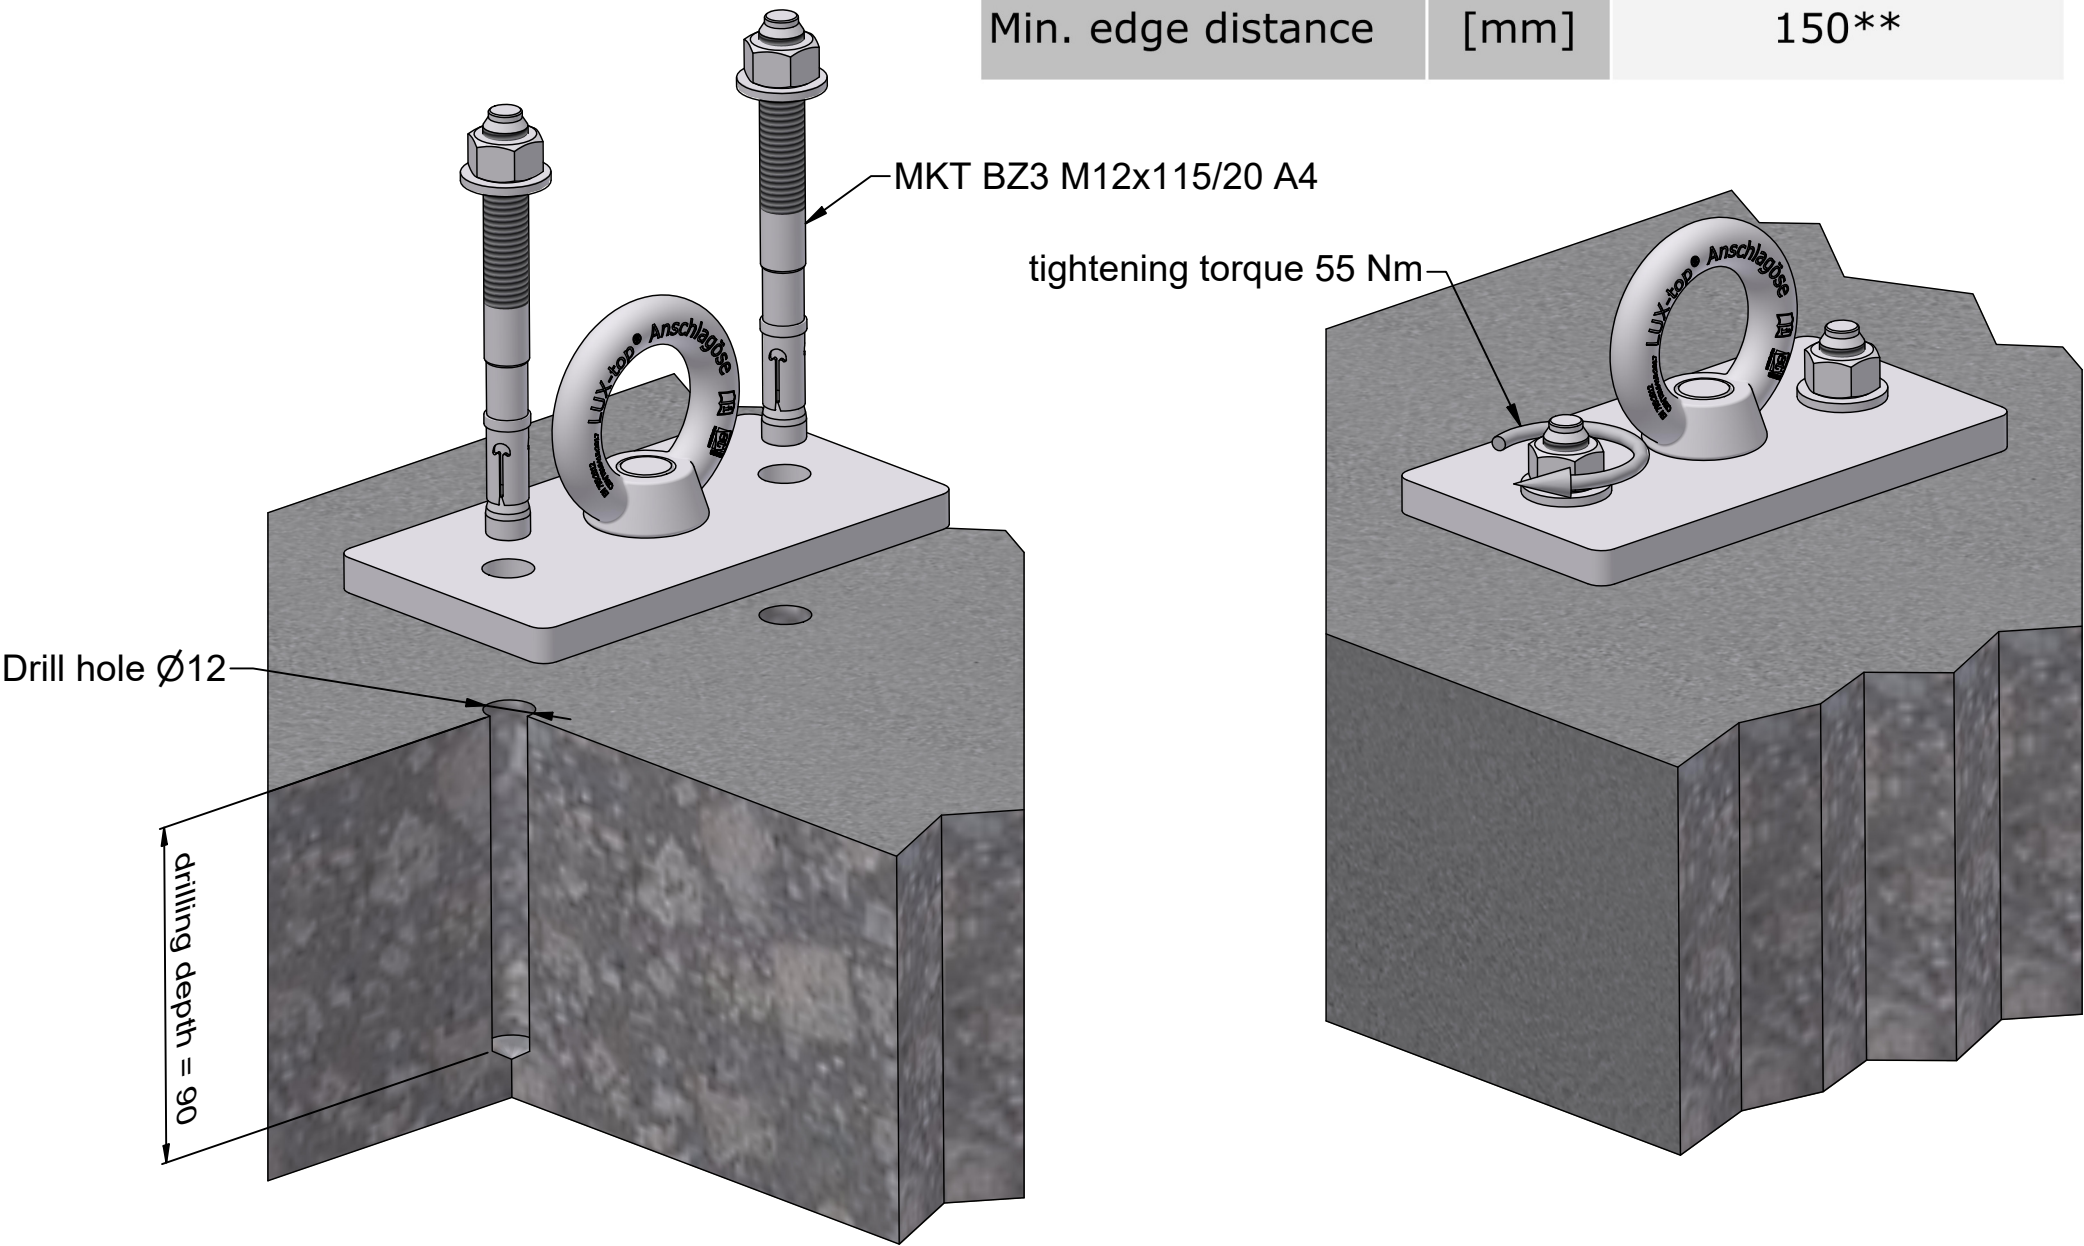

Concrete components - strength class mind. C20/25 (B25)

Mounting data*

Baseplate dimensions	[mm]	80x150x10 (2-Loch)
Anchor bolt	[type]	BZ3 M12x115/20 A4
Drill hole-Ø	[mm]	12
Min.drilling depth into concrete	[mm]	90
anchoring depth into concrete	[mm]	70
Tightening torque	[Nm]	55
Wrench size	[mm]	19
Min. component thickness	[mm]	120
Min. edge distance	[mm]	150**

Assembly procedure:

1. Position the pre-assembled anchor point desired location.
2. Drill holes through the holes in the anchor point footplate. Clean the drill holes thoroughly (brush and blow out) !!!
3. Drive in the concrete anchors and apply the apply the specified torque. Use a torque wrench.

*) For use in Germany, the information from the abZ Z-14.9-727 must be observed.
**) For verification according to technical building regulations, smaller distances may be possible.
