Anchor device type B
Type: LUX-top® QUICKFIX II

16.2 Description

The anchor device of type LUX-top® QUICKFIX II is used to simultaneously protect a maximum of three person against falls from a height (Fig. 1).

The anchor device consists of two beam clamps made of sheet metal ($t = 4 \text{ mm}$), which can be moved freely on the threaded rod (M16) and locked on both sides using nuts. The clamping range of the anchor device is from 100 mm to 200 mm.

At one end there is an eyelet holder made of 90° bent sheet metal ($t = 6 \text{ mm}$) with an M16 eyelet. This eyelet is used to hold the personal protective equipment against falls. The anchor device is fixed to the structural facility by tightening the anchor device using the hexagon nuts on the two beam clamps. The anchor device is designed for loading in all directions and is made of corrosion-resistant steel.

The anchor device can be used with temporary horizontal anchor devices type C. The force on the end and intermediate anchors introduced by the anchor device type C must not exceed a value of 12 kN.
